FP&A Manager - Business Intelligence

Pvolve

February 2023—February 2024

- Developed SQL queries to automate weekly data extraction, accelerating the process by 50 percent and reducing errors, consequently granting senior leadership expedited access to company performance metrics
- Prepared consolidated forecasts and projections for multiple studios and corporate entities using various assumptions and scenarios to assist in guiding operations and the leadership team's decisions
- Developed a financial model to furnish new franchisees with a strategic pathway to achieve profitability
- Leveraged financial analysis expertise to collaborate with Franchise Development team and franchisees, enabling successful launch of five new studios while ensuring fiscal soundness and alignment with business goals

Data Analyst

Seasoned

July 2022—January 2023

- Collaboratively worked as part of the Finance-Operations Team, providing data insights throughout multiple subdepartments
- Used SQL, Periscope, Salesforce, and Microsoft Office Suite products to capture, manipulate and manage large datasets
- Streamlined leads generation process improving turnaround time while also resulting in 60 percent savings in computing costs and additional savings in labor
- Worked with the Business Intelligence and Data Engineering teams to design and develop data infrastructure, supporting growth and evolution
- Led the development of user-friendly dashboard and reporting templates including integrating data visualization
- Due to diligent analysis, uncovered inconsistencies in financial reporting, which improved end of month reconciliations
- Worked with stakeholders to shift company focus from geographic based growth to a more targeted brand-based growth model.

Business Analyst

Titanium Healthcare Inc

January 2021—June 2022

- Built strong relationships between internal stakeholders while providing exceptional analytical services to support the development of initiatives
- Gathered requirements from the COO, CFO and Financial Controller to understand their expectations of a forecasting and budgeting process
- Utilized Tableau and Excel to create a forecast and budgeting template for 7 medical clinics, driving better

strategic and operational decisions

- Saved the company over \$100K in annual costs through the elimination of redundant billing and creating processes for technology procurement
- Produced advice on the provision of financial information and cash flow issues that may impact the wider company
- Streamlined the accounts payable process by implementing Bill.com, which subsequently reduced the time spent on critical matters
- Increased operational efficiencies by initiating and implementing Concur and Lattice systems

Data Analyst

HR Unlimited Inc

June 2020—January 2021

- Managed a portfolio of projects for 50 clients with datasets containing over 50,000 records
- Facilitated stakeholder sessions with the aim of defining and documenting business requirements and eliciting business decisions
- Co-led data visualization projects for clients, using Tableau to create replicable and visually impactful dashboards
- Identified and communicated areas of improvement across the business through an in-depth research and analysis activity
- Enabled clients to improve current workforce makeup, diversity, and capabilities by identifying and highlighting problem areas and risks

Accounting Clerk,

Soco Tax & Cloud Accounting

November 2017—April 2020

- Provided high-quality bookkeeping services to clients across 4 sectors, including cosmetic, eCommerce, food service and solar energy
- Supported the reconciliation process which included reviewing financial statements while investigating and resolving discrepancies
- Enabled clients to build their knowledge and understanding of their own financial performance by creating forecasts and dashboards
- Maintained thorough records of accounting information and ensured that all information was handled with a high level of discretion
